

### **VAT rates in multiple countries in ArchivistaERP**

**Egg, Switzerland, 16 February 2016:** *There are of course more interesting topics than value added tax. Nevertheless, value added tax (VAT) is among the first taxes that causes headaches among entrepreneurs. In this context, the correct setting up of VAT rates is an important part of any entrepreneurial activity. The following blog post shows how multiple rates for several countries can be implemented in ArchivistaERP.*

### **Multiple VAT rates across borders in ArchivistaERP**

The fact that VAT is payable on services that are provided is generally well known. SME companies usually apply the normal rate of 8% in Switzerland and 19% in Germany. However, there are reduced rates for certain goods, such as food and/or books. For foodstuffs, the reduced rate is 2.5 per cent in Switzerland and 7 per cent in Germany.

**Taxes**

Description	Default Rate (%)	Sales GL Account	Purchasing GL Account		
VAT CH	8.0	2660 VAT CH (8%)	2680 MwSt CH (Vorsteuer)	Edit	Delete
VAT CH	2.5	2661 VAT CH (2.5%)	2680 MwSt CH (Vorsteuer)	Edit	Delete
VAT DE	19.0	2664 VAT DE (19.0)	2682 MwSt DE (Vorsteuer)	Edit	Delete
VAT DE	7.0	2665 VAT DE (7%)	2682 MwSt DE (Vorsteuer)	Edit	Delete

Add

Description	VAT CH
Default Rate	8.0 %
Sales GL Account	2660 VAT CH (8%)
Purchasing GL Account	2680 MwSt CH (Vorsteuer)

Update Delete

Companies that have products with various rates in their product range have to be able to reflect this in their ERP solution. The following shows how the rates can be correctly set up in ArchivistaERP so that the correct tax rate is automatically billed for each product. In order to further increase the complexity in the example, two countries are set up, each with two different rates. This is not done in order to 'batter' users with complexity, but rather to demonstrate the difference between tax rates, tax groups and tax types. And, it should also be mentioned in this context that in particular (Swiss) companies that deliver abroad cannot avoid having to get to grips with the issue of value added tax across different countries. Because, let's be honest, what is the point in having a great web shop if the VAT cannot ultimately be correctly recorded per country in the ERP solution.

### Tax rates in ArchivistaERP

The individual tax rates must first be defined in ArchivistaERP. The rates can be managed via 'Set up' and then 'Tax rates'.

**Taxes**

Description	Default Rate (%)	Sales GL Account	Purchasing GL Account		
VAT CH	8.0	2660 VAT CH (8%)	2680 MwSt CH (Vorsteuer)	Edit	Delete
VAT CH	2.5	2661 VAT CH (2.5%)	2680 MwSt CH (Vorsteuer)	Edit	Delete
VAT DE	19.0	2664 VAT DE (19.0)	2682 MwSt DE (Vorsteuer)	Edit	Delete
VAT DE	7.0	2665 VAT DE (7%)	2682 MwSt DE (Vorsteuer)	Edit	Delete

Add

Description	VAT CH
Default Rate	8.0 %
Sales GL Account	2660 VAT CH (8%)
Purchasing GL Account	2680 MwSt CH (Vorsteuer)

Update Delete

The above figure shows the example of the four value added tax rates mentioned above.

### Tax groups (per country)

The tax rates in ArchivistaERP now have to be assigned to tax groups. One tax group is opened for Switzerland and one for Germany.

### Tax Groups

Description	Tax Shipping		
CH	Yes	Edit	Delete
DE	Yes	Edit	Delete

Add

Description: CH  
Tax Shipping: Yes

Select the taxes that are included in this group.

Tax	Default Rate (%)	Rate (%)
VAT CH (8%)	8.0	8.0
VAT CH (2.5%)	8.0	2.5
None	8.0	8.0
None	8.0	8.0
None	8.0	8.0

Update Delete

The respective country-specific tax rates are defined in the tax groups. Above the two tax rates for Switzerland and below those for Germany.

Description	Tax Shipping		
CH	Yes	Edit	Delete
DE	Yes	Edit	Delete

Add

Description: DE  
Tax Shipping: Yes

Select the taxes that are included in this group.

Tax	Default Rate (%)	Rate (%)
VAT DE (19%)	19.0	19.0
VAT DE (7%)	19.0	7.0
None	19.0	19.0
None	19.0	19.0
None	19.0	19.0

Several departments can now be managed for each customer in ArchivistaERP. Each department of a customer is now assigned the desired tax group. Below an example for the Swiss tax group:

### Customer Branches

Customer

Name	Contact	Sales F
Peter	Muster	Verkaufsperson

**Name and Contact**

Branch Name

Contact Person

Phone Number

Fax Number

E-mail

Send Documents by Mail

**Sales**

Sales Person

Sales Area

Default Inventory

Location

Default Shipping

Company

Tax Group

Language

Disable this Branch

ArchivistaERP thereby 'knows' that all sales generated with the customer are to be billed using the Swiss rates. For a German customer, 'VAT DE' would be entered there.

### Tax types (for articles)

The desired tax types are now assigned to each article. For this purpose, the tax categories for the articles are recorded for 'Articles and Stock'.

Tax Name	Rate	Is exempt																		
VAT CH	8.0 %	No ▾																		
VAT CH	2.5 %	Yes ▾																		
VAT DE	19.0 %	No ▾																		
VAT DE	7.0 %	Yes ▾																		
Update																				

The entry 'only' is opened once there. Those tax rates that are not to be applied are set to 'No' there. If using the normal rate, the No therefore applies to 2.5 per cent for Switzerland and the 7.0 per cent rate in Germany, because if using the normal rate 'only' 8 and 19 per cent are used, respectively. A second rate is now recorded, which is given the designation 'red' for the reduced rate.

Name	Tax exempt		
nor	No	Edit	Delete
red	No	Edit	Delete

Add

Description	<input type="text" value="red"/>
Is Fully Tax-exempt	<input type="button" value="No"/> ▼

Select which taxes this item tax type is exempt from.

Tax Name	Rate	Is exempt
VAT CH	8.0 %	<input type="button" value="Yes"/> ▼
VAT CH	2.5 %	<input type="button" value="No"/> ▼
VAT DE	19.0 %	<input type="button" value="Yes"/> ▼
VAT DE	7.0 %	<input type="button" value="No"/> ▼

The 'normal' rates are now deactivated, because only the reduced rates are to be applied. The reduced rate is now assigned to the articles in those items for which this is the case.

## Items

Select an item

[Add](#)

Item	
Item Code	bred
Name	Bred
Description	
Image File (.jpg)	<input type="button" value="Browse..."/> No file selected.  <input type="checkbox"/> Delete
Category	Komponenten
Item Tax Type	red
Item Type	Manufactured

The decisive factor is 'Tax type for article'. The tax rates, groups, and types in ArchivistaERP are thus now set up correctly. As a reminder - all the tax rates must be recorded. For each tax group, the tax rates are to be defined per country, and the tax type (for example, normal or reduced) must be defined for each article.

### Calculate and book the correct value added tax in ArchivistaERP

The invoicing can now be carried out. In the fictitious example, bread and a computer are sold (based on the Roman motto bread and games). ArchivistaERP automatically detects during billing which tax rate is to be used, by means of the tax group and tax type of the articles. The correct sub-amounts are of course also shown on the invoices:

SALES INVOICE 54

Charge To	Charge Branch	Delivered To	Reference	38	Currency	CHF	Our Order No	62
Meili + Co Thurgauerstr. 55 8800 Thalwil	Peter	Meili + Co Peter Thurgauerstr. 55 8800 Thalwil	Customer Order Ref.		Shipping Company	Default	Sales Type	Endkunden
			Invoice Date	10/31/2016	Due Date	11/10/2016		

Item Code	Item Description	Quantity	Unit	Price	Discount %	Total
comp	Computer	1.00		293.23		293.25
bred	Bred	7.00		2.27		15.90
					Sub-total	309.15
					Shipping	20.00
					VAT CH (8%)	25.05
					VAT CH (2.5%)	0.40
					TOTAL INVOICE	354.60

Above is the web view for an order, below the display for the amounts on the PDF invoice:

	Sub-total	309.15
	Shipping	20.00
	Sub-total	329.15
VAT CH (8%): 25.05, VAT CH (2.5%): 0.40		25.45
	<b>TOTAL INVOICE</b>	<b>354.60</b>

It goes without saying that the amounts are booked correctly to the previously defined accounts.

**Note** regarding delivery costs: Delivery costs are considered to be ancillary services, for which value added tax is also billed. The first tax rate in each tax group is currently used in ArchivistaERP. A 'packaging' article item could of course also be invoiced for products with a reduced rate.

#### **TAX-reversed solution for smaller companies**

**Note:** Each company will have to consider carefully whether it wants to maintain several VAT rates in different countries. For some non-EU countries (Switzerland is of course one of these), there is the possibility of using the so-called TAX-reversed regulation, see [wikipedia](#) for more information. For this, '**TAX-reversed**' or reversal of the tax liability pursuant to [Sec. 13b UStG \(VAT Act\)](#) must be stated on all 'foreign' invoices. The recipient of the invoice then has to cover the tax debt to the state directly. In specific terms, for ArchivistaERP this means that the tax rates for Germany are set at 0 per cent. Even though '**TAX-reversed**' is the right choice for smaller Swiss companies in the vast majority of cases, because of the considerably less effort involved, it is still good to know that the individual billing can subsequently be switched on at any time. Companies in Germany and elsewhere are also well advised to ensure that, with regard to value added tax, ERP solutions can actually be set up with several rates, groups and tax types.

#### **Bonus: Sending mails from ArchivistaERP**

With the current release, receipts (currently quotes, orders and invoices) can be sent directly from ArchivistaERP. The settings required for this are in the preferences (Settings menu).

Sending Email	
SMTP server	mailnew.archivista.ch
Port for server	25
Authentication	<input checked="" type="checkbox"/>
User	mailerp
Password	●●●●●●●●
Mail sender	webmaster@archivista.ch

In order to send a PDF document directly from ArchivistaERP, the 'Customer and Sales Reports' (Sales menu) must be called up, from which 'Print Order' or 'Print Invoices/Credit Notes' can be selected. In order to ensure the email is sent, the 'Mail to customer' flag should be set to 'Yes'. Then click the 'Display:Print...' button. The PDF file is sent immediately, although of course only if the mail address has been recorded either at the customer or at the customer's department.
