

## ArchivistaDMS 2017/IV: Optimized for mobile phones

**Egg, 12 April 2017:** The ArchivistaBox has been web-based since 2005. This ensures that no software needs to be installed on the clients. For this reason, ArchivistaBox has always been accessible with mobile phones. A new feature of ArchivistaDMS 2017/IV is that a view has been created that has been optimized for mobile phones.

### Back in 2009

Already in 2009 the ArchivistaBox could be presented on a mobile phone. The solution at that time was instrumental in helping ArchivistaBox to find its way onto various ARM-based computers. The WebClient on the cell phone at that time ran wonderfully, and since then it has stayed that way.

### Today in 2017

Over the years, the displays of these small devices exploded to such an extent that today's mini displays have a resolution that the individual pixels (open even with a magnifying glass) can no longer be perceived. For the existing WebClient, this means that although it can be displayed effortlessly, working without coming in and going out is only of limited pleasure.

In the meantime, many competitors have released a mini version of the software in the form of an app. However, it is forgotten that apps have to be installed on the devices. A new release always means for the users to install new software. Calling a Web application optimized for mobile phones is child's play, does not require any installation or subsequent updates. Version 2017/IV of ArchivistaDMS therefore provides an optimized WebClient for ArchivistaDMS.

### WebClient 2017/IV: Work as usual....

If you are on the move with iOS and/or Android, you simply start the entry address of the ArchivistaBox from your device. The WebClient automatically detects that a mobile device 'docks'.

# Archivista WebClient

Version 2017/IV - Powered by [Archivista GmbH](#)

Host

Database

Username

Password

Language

**Customer: Archivista GmbH, avbox177**  
**Supported by Archivista**  
**Pilatus**  
**Docs: 20000000**  
**Licences: 4**  
**FTP/Scan: YES**  
**API: YES**  
**COLD: YES**  
**Mail: YES**  
**Barcodes: YES**  
**FormRec: YES**  
**Space: 20997 of 327680 MB**

After logging in, a slightly simplified view of the WebClient appears:

Do	P	Dat	A	Ti	FL	FM	MM	FF	L	Download	
21(1	12/2N									PDFIMG	
21(1	12/2N									PDFIMG	
21(4	12/2N									PDFIMGFile	
21(4	12/2N									PDFIMGFile	
21(4	12/2N									PDFIMGFile	

**View** **Search** **Edit**

**Document**

**Fulltext**

**Pages**

**Folder**

**Date**

**Archived**

**Owner**

**Title**

**Rubrik**

**Rubrik1**

**Rubrik2**

To enlarge the page, click on the current page (picture), then the side view is displayed as usual:

```
#!/bin/bash
. ${0%/*}/strings.in
. ${0%/*}/gnomesu.in
BACKUP_SETUP_MSG='findit "BACKUP_SETUP_MSG" $zeile'
# PATH and co
. /etc/profile
callOK "$BACKUP_SETUP_MSG" "$*"
# include shared code
. ${0%/*}/backup-setup.in /home/archivista/backup.sh
get_days
# disable?
if [ "$tdays" = 0 ]; then
    crontab_remove /home/archivista/backup.sh
    echo "" > /etc/backup-webconfig.conf
    exit
fi
get_time
#####
# Save days and time in config for webconfig!
(
    echo "days=$days"
    echo "time=$time"
) > /etc/backup-webconfig.conf
crontab_add /home/archivista/backup.sh $h $m $days
```

And if you prefer to hold your mobile phone horizontally, you will automatically find the matching view:

The screenshot shows the MobileWebClient interface. At the top is a toolbar with various icons. Below it is a navigation bar with buttons for 'DoP', 'Dat', 'A Title', 'Rubri', 'Land', 'Regic', 'Mail', 'Fr', 'Mail', 'To', 'Mail', 'CC', 'Mail', 'Su', 'Firme', 'Firme', 'Doku', 'Download', 'PDFIMG', and 'PDFIMG'. Below the navigation bar are two lines of text: '21/1 12/2N' and '21/1 12/2N'. The main area has tabs for 'View', 'Search', and 'Edit', with 'View' selected. The document title is 'Document 21037'. Below the title are sections for 'Pages 1', 'Folder 256', and 'Date 12/21/2017'. The 'Archived No' section lists various fields: 'Owner', 'Title', 'Rubrik', 'Rubrik1', 'Rubrik2', 'Land', 'Region', and 'MailFrom'. To the right is a preview of the document, which includes a date box ('Date 12.2017 170003'), a text block about the Bauarena, a photo of a person, and a large image of an interior space with a glass floor.

You can switch back and forth between the mobile and classic views on your mobile phone as well as on your desktop. Just enter the parameter '**mobile=1**' or '**mobile=0**' on the navigation bar and you can easily switch between them. It is not necessary to log out/logout.

### Result: Simply work

The mobile view of the WebClient simplifies working on the mobile phone immensely and is immediately available without the need to install apps. Naturally, the documents can also be easily edited.
