First hand support and training
Of course you can also read the comprehensive ArchivistaBox manual yourself. But you probably basically prefer to receive uncomplicated and rapid assistance. Alongside the normal support provision, we and our partners are also available at any time to provide training. You can come to us for that and give us the privilege of welcoming you to our training facilities, or we can train you directly on-site, as our ArchivistaBox concept means that the most modern hardware and software is available at any location.

On-site training
For scheduling reasons we would be very happy if you can contact us in good time regarding dates for training. As the customer, you determine the number of participants – normal charges apply irrespective of if a small or large group is being trained.
